Work experience

Digitise Australia Pty Ltd – Fullstack Software Developer

August 2021 – Present

Developed an internal CRM for a construction certification company and other proprietary software.

- Built a CRM system from scratch for internal use by company employees.
- Constructed an integration platform between the CRM system and the company's customers.
Website: <https://approved.au>
- Developed an application for generating publisher quality PDF files for invoicing, quotes, and legal documents. Key technologies: Node.js, Pug and Prince.XML
- Mentored junior developers through code reviews, pair programming, and software architecture walkthroughs..

Technology stack: Node.js, SQL Server, Azure (App Services, Functions, Blob storage, Cognitive Search, Application Insights), React, GitHub CI/CD, Docker, Bash.

Labado, Kaliningrad – Backend Software Developer

January 2020 – July 2021

Developed backend systems for various web platforms.

- Participated in the creation of the backend for PartsClub, an auto parts marketplace. Refactored code from the previous developer, developed the admin page, and integrated the payment system.
Website: <https://partsclub.ru>
- Developed the backend for a personal course platform from scratch and deployed the final product to production.
Website: <https://arublev.com>
- Contributed to the backend development of Most.Doktor, a service that involved working with legacy code. Migrated the database schema from code to UML diagram and normalized its design.
Website: <https://most.doctor>

Technology stack: Node.js, NestJS, PostgreSQL, RabbitMQ, Docker, Nginx

Skills

Backend: Node.js, NestJS, Express, PostgreSQL, MongoDB, Redis

Frontend: React Next.js

Testing: Jest

Cloud: Azure
