Eugene Ganshin

Saint-Petersburg, Russia
(+7) (908) 836-49-25
e.s.ganshin.work@gmail.com

Fullstack Software Engineer with expertise in building robust and scalable applications. Experienced in developing CRM systems, integration platforms, and backend solutions.

Work experience

Digitise Australia Pty Ltd, Fullstack Software Developer

August 2021 – Present

Developed an internal CRM for a construction certification company and other proprietary software.

Professional Contributions:

- Built a CRM system from scratch for internal use by company employees.
- Constructed an integration platform between the CRM system and the company's customers.
  Website: https://approved.au
- Developed an application for generating company PDF documents. Key technologies: Prince.XML
- Conducted code reviews and provided mentorship and guidance to junior developers.

Technology stack: Node.js, MSSQL, Azure (Functions, Blob storage, Cognitive Search), React, GitHub CI/CD, Docker.

Labado, Kaliningrad – *Backend Software Developer*

January 2020 – July 2021
Developed backend systems for various web platforms.

Professional Contributions:

- Participated in the creation of the backend for PartsClub, an auto parts marketplace. Refactored code from the previous developer, developed the admin page, and integrated the payment system.
  Website: https://partsclub.ru
- Developed the backend for a personal course platform from scratch and deployed the final product to production.
  Website: https://arublev.com
- Contributed to the backend development of Most.Doktor, a service that involved working with legacy code. Migrated the database schema from code to UML diagram and normalized its design.
  Website: https://most.doctor

Technology stack: Node.js, NestJS, PostgreSQL, RabbitMQ, Docker, Nginx

Skills

Backend: Node.js, NestJS, Express, PostgreSQL, MongoDB, Redis

Frontend: React Next.js

Testing: Jest

Cloud: Azure

Other: GitHub CI/CD Docker Linux

Languages
